Campus Computing, Communications, & Information Technologies (CCIT) provides computing and networking services to meet the instructional, research, administrative, and networking infrastructure needs of the campus. CCIT manages and operates campus networks along with central academic and administrative computing systems, telecommunication systems, a high performance computing system (see http://geco.mines.edu), and computer classrooms and workrooms in several locations on campus. CCIT's customer services and support group also provides technical support for most electronic classrooms, departmental laboratories and desktops throughout the campus.

Central computing accounts and services are available to registered students and current faculty and staff members. Information about hours, services, and the activation of new accounts is available on the website at http://ccit.mines.edu/, in person at the Help Desk in the Computer Commons (in CTLM 156), or by calling (303) 273-3431.

Workrooms in several locations on campus contain networked PCs and workstations. Printers, scanners, digitizers, and other specialized resources are available for use in some of the locations.

In addition to central server and facilities operations, services supported for the campus community include e-mail, wired and wireless network operation and support, access to the commodity Internet, Internet 2, system and network security, volume and site licensing of software, videoconferencing, student registration, billing, and other administrative applications, campus web sites and central systems administration and support. CCIT also manages and supports the central learning management system (Blackboard), printing, short-term equipment loan, and room scheduling for some general computer teaching classrooms.

All major campus buildings are connected to the network operated by CCIT and most areas of the campus are covered by the wireless network. All residence hall rooms and Mines Park housing units are directly connected to the campus network along with most fraternity and sorority houses.

All users of Colorado School of Mines computing and networking resources are expected to comply with all policies related to the use of these resources. Policies are updated periodically and are available via the web pages at http://ccit.mines.edu.
